

## **Anutra Medical Receives 510k Approval and Launches New Dental Syringe to Market**

For Immediate Release

January 8, 2015

**Morrisville, NC** – In January 2015, Anutra Medical received 510k approval from the FDA on a new disposable, feedback aspiration syringe. This syringe is the first known innovation on the traditional, metal, one-handed aspiration dental syringe.

Overcoming many shortcomings of the traditional dental syringes, Anutra Medical has developed a light, ergonomic, bulk-delivery, disposable dental syringe. Until now, an aspiration dental syringe is limited to holding only one cartridge at a time. A cartridge is a small vial that typically holds 1.8 mL of fluid. Most dental restorative procedures require the use of multiple cartridges. As a result, Anutra Medical engineered the Anutra Feedback Aspiration Syringe® to hold up to 5 mL of fluid, a major innovation.

To further enhance a clinician's experience, the Anutra Feedback Aspiration Syringe® is designed with audible and haptic feedback. With the traditional metal syringe, it can be difficult to know just how much anesthetic is being injected into a patient. With Anutra's new syringe, it is easy for a clinician to both hear and feel a click for each milliliter that is being injected. Additionally, the Anutra Feedback Aspiration Syringe® is equipped with double-sided volume labeling to allow a dentist to easily see how much anesthetic is being administered regardless of the angle.

### **About Anutra Medical, Inc.**

Located in Research Triangle Park, NC, Anutra Medical is a team of experienced dental and health care professionals focused on providing solutions to enhancing the patient experience and increasing office efficiency. We are leveraging the science of buffering local anesthetics through our innovative and revolutionary delivery system. Our core belief is creating partnerships with practices. We foster these relationships by either performing in office implementations or utilizing technology for educating and training. Questions?
